

## Acid Free Mounting and Laminating Films

### Long Life Cold Adhesives

The adhesives used in Artgrafix' acid free mounting and laminating films meet The Library of Congress Standards for the Preservation of Artifacts (100-101 and 100-111). The adhesives do not contain acidic components and will not affect the pH of water or aqueous inkjet inks over time. Manufacturer's documentation is available. They have been tested per the TAPPI 428 acidity test.

The non-yellowing adhesives have a shelf life up to 5 years and form permanent bonds when used. The gloss laminate is a high sheen gloss film while the matte has a soft non-reflective finish. The release liner is a heavy weight paper for ease of use for processing valuable fine art prints.

Designed for use with Fine Art Papers, these adhesives can be safely used with any Inkjet media on a roll laminator.
