

Liner Free Over-Laminate Films

New Film & Adhesive Technology

The films used on Artgrafix Liner Free laminate is top coated with an optically clear silicon coating which eliminates the need for release liners that covers conventional over-laminate films. This eliminates the disposal of these liners as well as makes these films easier to use.

The adhesives used on Liner Free films contain a time/temperature cold-flow property that improves the performance of the film with aging. The adhesive performance continues to improve after application, reducing orange peel, fish eyes and strengthening bonding over time, unlike some adhesives where a high initial adhesion value is observed but drops off with time.

Designed for use with Daige and Drytac JetMounter Laminators, these films can be used with any roll laminator which can use a 3 inch core.

Apply Laminate Directly to print without any liner to remove

- **Environmentally friendly—less waste**
- **Easy to use—no liner to remove**
- **Non-yellowing adhesives**
- **Optically Clear**
- **UV Protection**
- **Permanent Bonding**
- **Threading board included with each roll**

Specifications

| Base Film | Film Thickness | Adhesive Thickness | Core Size | Adhesive | pH |
|---------------------|---------------------|--------------------|-----------|----------|-----|
| Gloss—polypropylene | 1.2 mil (30 micron) | .6 mil (15 micron) | 3" | Acrylic | 7.0 |
| Matte—polypropylene | 1.2 mil (30 micron) | .6 mil (15 micron) | 3" | Acrylic | 7.0 |

Gloss and Matte Laminate & Threading Board

Liner Free Sizes

Gloss Laminate

| | |
|---------------|--------|
| 10"x150' Roll | 180410 |
| 18"x150' Roll | 180400 |
| 25"x150' Roll | 180401 |
| 38"x150' Roll | 180402 |

Matte Laminate

| | |
|---------------|--------|
| 10"x150' Roll | 180409 |
| 18"x150' Roll | 180403 |
| 25"x150' Roll | 180404 |
| 38"x150' Roll | 180405 |

We also offer a wide range of adhesive coated Mounting Boards in sizes up to 48"x96"
