

# **DEMCO PHOENIX** Heated Pouch/Roller Laminators

## Print display made easy and ready to grow with you

The **PHOENIX** laminator is a professional grade laminator. Robustly designed, the **PHOENIX** uses steel frame construction with high quality large diameter silicon rolls for glass-like results. Variable speeds and temperatures lets the **PHOENIX** work with all medias and laminates, including thick fine art papers and textured laminates. Easy to use with professional results right out of the box, the **PHOENIX** requires no set-up and uses standard 110V power. And as you grow, the **PHOENIX** can grow with you. For larger volume requirements, the **PHOENIX** converts into a roller laminator allowing you to use a wide range of films, letting you save time and money.

### The **PHOENIX** Features

- Clear Glass Front Cover
- Single control roller height adjustment
- Print Feed Guides
- Large 4" Diameter Silicon Rollers
- Optional Roll Film Kit
- Safety Shield
- Rugged Design
